

From water bottles to wind-up toys

From mugs to milk pouches

From jars to juicers

Reliance touches everybody's life.

From pipes to packaging

From gas-masks to garbage cans

From bottles to bathtubs

As the largest polymer manufacturer in the country, Reliance provides the raw materials for making almost every kind of plastic you've seen. This has enabled Reliance to touch the lives of millions for the better. Not just through the plastic products that it helps create but also because all Reliance plastics are recyclable and eco-friendly.
