Dear Friends,

Our heartiest congratulations to the Chief Minister - Shri Eknath Shinde, and the Deputy Chief Minister - Shri Devendra Fadnavis on taking over the reign of Maharashtra and we look forward to working closely with them, to help, once again, to make Mumbai “Urbs Prima in India” a title which Mumbai has borne with pride and a certain panache.

Our heartiest congratulations also to Shri Vivek Phansalkar on his taking over as the Commissioner of Mumbai Police. I recall with great pleasure, the excellent support from him when he was Joint Commissioner of Police (Traffic), and look forward to working with him to make Mumbai a safe and secure city. Our very best wishes to him for a happy and successful tenure.

As already mentioned, during the Silver Jubilee year of Mumbai First, we identified “Climate Action” as one of our core themes, and continuing our initiative, we organized recently, another international conference, “Climate Crisis 2.0: Mobilizing Climate Finance for Coastal Cities”, specifically dealing with challenges faced by coastal cities. The conference was inaugurated by the then Environment Minister – Shri Aaditya Thackeray and we had some excellent national and international speakers. An important part of our discussion related to the need for resilient climate finance and development of an effective environmental plan for coastal cities like Mumbai. An important recommendation emanating from the conference was the need to create a single planning authority in Mumbai and hopefully, at some point, a single point of accountability for the execution of various projects in the city.

We are delighted that India will take over the Presidency of the G20 on 1st December 2022 and this, we believe, will be an excellent opportunity for India to shape the global economic agenda and contribute with its own priorities and ideas.

It will be recalled that during India’s Presidency of the BRICS nations in 2016, we had successfully organized a 3-day “BRICS Friendship Cities Conclave” in Mumbai and the proceedings were presented at the Heads of States Summit in Goa, later that year.

Taking a cue from this, we have requested the Ministry of External Affairs, to allow us to organize in Mumbai, the Urban 20 Summit (U20), dealing with urban issues, during India’s Presidency of G20. Urban 20 will help bring the local city perspectives to the G20 agenda. On this occasion, we also propose to invite Mayors of the G20 cities, to share their experiences, dealing with the challenges presented by the two years of pandemic and what cities need to do to emerge more liveable, sustainable and resilient. Also, on this occasion, in collaboration with the European Union, a meeting of the Covenant of Mayors will be convened in Mumbai.

The Stern Committee Report of 2006 and subsequent international studies have warned that coastal cities are very vulnerable. The newly released IPCC’s Assessment Report, once again, reminded us, that sea levels will continue to rise during the 21st century and several coastal cities like Mumbai, Bangkok, Hong
Kong, Tokyo, Bangladesh, and Jakarta, will be most vulnerable to sea-water temperature rises. At the recent Glasgow COP26, leaders from several countries expressed their concerns about the challenges their coastal cities face due to sea water temperature rises and asked for international communities to help. Also, during the proposed U20 Summit in Mumbai, we will specifically focus on, amongst other areas, the challenges faced by coastal cities due to climatic disasters and what proactive steps could be taken.

We believe this will be an excellent opportunity to showcase Mumbai’s cultural and infrastructure strengths. In the recent past, Mumbai has raised its own resources and is now in the process of executing infrastructure projects of more than Rs 200,000 crores of global standards. There is no other city in India that can match infrastructure investment of this scale.

We are anxiously awaiting from Delhi, a positive and go-ahead response, to make plans for the U20 Summit in Mumbai next year.

Over the last few months, despite lockdown and other restrictions, we have organized several programs and details of these are provided in the ensuing pages.

Best wishes,

Narinder Nayar
Chairman, Mumbai First
Dear Mumbaikars,

As our country proudly completed 75 years of Independence, remembering the glorious history of independence in India, as well as Mumbai city, is inevitable. The nation celebrated 'Azadi ka Amrit Mahotsav' enthusiastically under the ‘Har Ghar Tiranga’ campaign everywhere. Much like the Indian freedom struggle, the city of Mumbai has had a prominent role in the pre-Independence freedom struggle as well as in the post-independence scenario of nation-building. Mumbai was the intellectual capital of the resistance during the freedom struggle and is the financial and economic capital since post-independence. As we look back at our past and celebrate our heritage, it is equally important to look towards the future and tackle the existential threat that Climate Change poses to a city like Mumbai.

Having said that, it gives me great pleasure to share that Mumbai First successfully organized the 'Climate Crisis 2.0: Mobilising Climate Finance for Coastal cities’ conference in May 2022. This two-day-long conference saw a host of technical sessions and keynote addresses by experts from around the world. The sessions provided perspectives about generating more green finance and learning from global professionals about climate sustainability and resilient urban planning. It also saw the participation of around 250 stakeholders from key government department representatives, Consul Generals of different global coastal cities, including Netherlands, Japan, Indonesia, Singapore, etc., City Planners and Managers, Scientific experts, Commissioners, Professors, Practitioners, students, and citizens. The conference offered an ideal platform to collaborate with the Global Leaders on Climate through networking events and strategy exchange sessions. It also provided for the stakeholders to share experiences, and best practices across global leadership and identify potential climate risks in order to propose achievable mitigation goals.

Over the last few months, our team has been engaging in two critical areas- Mental Health & Education. Having recognized that the crisis of mental health requires urgent attention, we are creating a directory of mental health services that can serve as a ready reference/Yearbook for all Mumbaikars in need. We urge all professionals and mental health service providers to reach out to us to be included in this directory.

In the field of Education, we are constantly engaging with various stakeholders to ensure that the National Education Policy can be adopted in form and spirit for the benefit of Mumbai’s public education system.

Lastly, I would like to announce a new initiative called 'Mumbai @ 75', where the spirit of the maximum city would be celebrated through different interactive and provocative sessions. The objective of this initiative is to highlight the role of Mumbai city in the past 75 years categorically focusing on governance, economic success & art and culture. This will be reminiscent of the trajectory of Mumbai as the financial capital of India in the post-independence era.

Dr. Neville A Mehta
CEO, Mumbai First
EU-Mumbai Cooperation

Mainstreaming Resilience In Metropolitan Planning In Mumbai Metropolitan Region.

The European Union (EU) is contributing to the Global Urban Agenda through international cooperation between EU cities and local authorities in the world to promote sustainable urban and energy policies. As a result of the EU-India and EU-Mumbai partnership, the EU would promote innovative solutions, technologies, and long-term planning for safer and more sustainable urban habitats.

After the pilot, Metropolitan Lab tested in Mumbai in 2016, and after the Workshop in Mumbai in March 2019, the brainstorming discussions between the EU experts and the local authorities’ representatives resulted in a list of specific projects that could help the Indian metropolis to find and adopt resilient and sustainable urban development.

As a follow-up, this year in June 2022 the Mumbai Metropolitan workshop was conducted with MMRDA under the Sustainable Urbanisation on ‘Mainstreaming Resilience In Metropolitan Planning In Mumbai Metropolitan Region. The list of potential project ideas were presented while these project ideas are slightly further developed as ‘fiches’ in order to help to establish the next generation of collaboration projects between the EU and Mumbai Metropolitan Region.

A 5-day Sustainable Urbanisation Planning workshop was organized in collaboration with Mumbai Metropolitan Region Development Authority (MMRDA) and the European Union (EU) under the India - EU Urban Partnership on Smart and Sustainable Urbanisation.

Shri. Bhushan Gagrani, Addl. Chief Secretary, Urban Development Department, Government of Maharashtra, Shri. S.V.R. Srinivas, Addl. Chief Secretary & Metropolitan Commissioner, Mumbai Metropolitan Region Development Authority (MMRDA), and Mr. Narinder Nayar, Chairman, Mumbai First were present at the Inauguration ceremony of the workshop. EU Counsellor Ms. Kamilla Kristensen Rai, Delegation of the European Union joined the program virtually. With a focus on Metropolitan planning, the intensive workshop provided inputs to support the sustainable and resilient urbanization of Mumbai.
The workshop, led by renowned European Urban Planner Mr. Pedro Ortiz, was held from 20th - 24th June at MMRDA premises. The aim of the Sustainable Urbanisation Planning workshop was to co-create a list of bankable projects and recommendations with all participants that aligned and supported the implementation of MMR's Regional Plan.

Forty participants representing key stakeholders attended the 5-day workshop. Participants included representatives from Mumbai Metropolitan Region, such as MMRDA, Maharashtra State Road Development Corporation, Mumbai Port Trust, Maharashtra Industrial Development Corporation, Jawaharlal Nehru Port Trust, City & Industrial Development Corp., and Mumbai Metro Rail Corporation Ltd. The workshop was successful in co-creating a list of bankable projects and recommendations that align with and support the implementation of MMR’s Regional Plan. These projects and recommendations cut across sectors such as housing, transportation, environment, economic activities, and social facilities. The projects are multifaceted and their sectoral integration was the key agenda for discussion.

The Mumbai Metropolitan Region (MMR), due to its vast area, economic significance, and vulnerability to climate issues has been identified as one of the six metropolises for the workshop. A forward-looking approach is required to ensure a smart, resilient, and sustainable growth trajectory for Mumbai.
Mumbai First organized the Climate Crisis 2.0 International Conference on Thursday, May 12 and Friday, May 13, 2022, with the support of various state government agencies, think tanks, and private sector organizations. It brought together local & international experts across the spectrum; local authorities, finance institutions, environmentalists, academicians, scientists, healthcare, NGOs, and other stakeholders to develop solutions to respond to climate change issues with a particular focus on coastal cities and the Mumbai Metropolitan Region (MMR).

The experts who participated in this conference provided several recommendations for developing an effective climate response, including:

- **Building local capacity for disaster management by identifying individuals** and local organizations in communities that can be trained to mobilize and manage people and resources in the event of a natural disaster.

- **Constructing sea walls** that can protect the city against rising tides and storm surges. Sea level data would determine the height of these walls.

- **Allocating capital for climate change** intervention strategies, adaptation policies, and research.

- **Flood management and forecasting**, along with strategies for mitigating flooding in vulnerable regions.

- **Managing transport infrastructure** identified as climate-vulnerable, and upgrading it for both resilience and reduced greenhouse gas (GHG) impact.
» **Estimating and reducing GHG emissions** - through real-time emissions modeling, particularly transport/traffic patterns.

» **Developing an evacuation plan for the city** - and awareness/training citizens on following it. Improving urban water use by increasing wastewater recycling. Water harvesting, recharging groundwater and revising water pricing and water regulation.

» **Investing in Adaptation will help cities respond to the climate crisis** - by
  - Saving lives from natural disasters
  - Avoiding economic losses
  - Increase resilience to bounce-back from disasters

» **Resilient audit of the existing and ongoing mega infrastructure projects across MMR** - with a point of view of how resilient and climate adaptive they are and what needs to be incorporated into that infrastructure to make them resilient.

» **A single planning authority for Mumbai and Mumbai Metropolitan Region** - Single point accountability for the governance of Mumbai and Mumbai Metropolitan Region.

» **To have a dedicated Environment and Climate Change Monitoring committee** - with state and non-state actors on one platform to take concerted action and implement the climate action plan.

Process of setting up single planning authority for Mumbai underway: Aaditya Thackeray

Why Indian states and cities need climate action
India may be on course with its net zero targets but most states are still unsure of how to deal with the climate crisis, says UNEP India head

Mumbai to get a single planning authority within a year: Aaditya Thackeray

Mumbai likely to get single planning authority this year: Cabinet minister Aaditya Thackeray
As a part of Mumbai First’s Mental Health Initiative, we are compiling a *Mental Health Directory of Services* - a Yellowbook of mental health services for our city. The Centre for Health and Mental Health, School of Social Work, TISS Mumbai is guiding us on this project. This directory will include mental health professionals and counselors, social workers in the field, organizations that work on improving mental well-being, etc. The idea for this project was born out of multiple consultations with Mumbai’s mental health community. A pressing need was felt for an easy, intuitive and user-friendly way to access information on mental health services. As individuals begin seeking out help, lack of awareness and stigma around mental health stands in the way of patients accessing necessary care.

If you are a service provider/organization that works in the space of mental health & well-being, please write to us / scan & fill the google form. We will include your services in Mumbai’s Mental Health Services Directory.
We collaborated with Royal Opera House for The Sunniest play on Broadway by Vishaal Asrani’s Institute of Performing Arts (VAIPA) in association with Concord Theatricals Ltd. on behalf of Samuel French (UK).

Members of the Mumbai First executive board met with Maharashtra Governor, Excellency Bhagat Singh Koshyari and discussed with him how we can boost Mumbai’s international profile in the upcoming year when India will take on the global presidency of the G20 forum.
Fool's Forum by Blue Ribbon Movement – Our collaborator Blue Ribbon Movement hosts a yearly Forum where organizations working in the civic space of Mumbai join to interact with interested citizens and young people of the city. Mumbai First team members participated on Sunday, 31st July at the in-person event titled “Fool’s Forum.” The team conducted a session for citizens interested in participating in the civic life of Mumbai and spoke about some of our priorities for the city, public-private partnerships, and how citizens can be more active in city life.

Mumbai First Team was invited to the American School of Bombay to give a presentation to students on the role of a think tank in working towards improving livability in Mumbai city. The session covered various topics like governance of the city, its various administrative divisions, and the role of government agencies involved in the functioning of the city. The team engaged with young students through interactive games & activities that urged them to reflect on their role as a citizen and engage with the city’s problems in a constructive manner.

Ms. Nandini Dias
At Blue Dart everything we do as part of Deutsche Post DHL serves one purpose: "Connecting People. Improving Lives." This guides our efforts and sense of responsibility, underscores our values, focuses on our mission, and creates long-term value. Fulfilling our purpose requires us to make every dimension of our business sustainable.

‘Connecting People, Improving Lives’, applies both to our business operations as an Express logistics company and also to our social engagement activities. To get there, we are following a clear strategy – a roadmap to sustainability that keeps our eyes on three key commitments under the motto of 'Connecting People, Improving Lives', Blue Dart (along with DPDHL) focuses on its corporate responsibility through three pillars namely GoTeach (Championing education), GoGreen (Protecting the environment) and GoHelp (Disaster management response). Blue Dart has partnered with NGOs of high repute to run programs under these three pillars.

Having said that, in a rapidly changing environment, Blue Dart has adopted CSR as a strategic tool for sustainable growth. For Blue Dart, CSR primarily means, the integration of business processes with social development and not merely an investment of funds for social activity. Blue Dart is one of the forerunners in CSR.

Under GoTeach, Blue Dart’s flagship Blue Edge programme –We provide vocational training programs aligned to SDGs (4, 5, 8, 9 and 16), with The Hope Foundation, Noida Deaf Society and Oasis India. The program includes life skills, computer training, English speaking for young adults in Mumbai, Chennai, Bengaluru, Kolkata and Delhi. Through Blue Edge, Blue Dart has successfully impacted 3,967 young adults since 2008.
In Mumbai, we are associated with Oasis India for around 14+ years. The program educates individuals about possible employment opportunities while equipping them with relevant skill sets, enabling them to make informed choices and bring stability into their lives. Students who have successfully completed this program have been felicitated at Graduation Ceremonies held in their respective cities, which further boosts their morale. Many of the students who have graduated from this program have been placed successfully in reputable organizations and sunrise verticals like Telecom, Retail, FMCG, etc. and have effectively kick-started their careers and lives.

Recently, when our group CEO, Frank Appel visited Mumbai, we had the opportunity of presenting one of the success stories of our Blue Edge Programme – Priyanka Bomne. She transitioned from a person who had average speaking skills, attitude problems, low self-confidence to an assistant to a dentist at Orthosquare Dental Clinic in Bandra. She has decided to continue with this job until she can get admission for a nursing course or a job in a hospital as that would be somewhere remotely close to her childhood dream of becoming a doctor. She is now able to contribute to her family's income and her father was also able to buy a car on loan. Oasis India & the Blue Edge programme changed her perspective of life and shaped her to be a person whom others like to associate with. She still receives appreciation by her family, relatives and friends for winning the best student award during her course with the Blue Edge Programme.

The award-winning Blue Edge: Empowering Lives programme, has been recognized on a global stage for its outstanding achievement in the field of education and has also won a Gold for the 'Best Education Program' by ACEF Asian Leaders Forum and Awards in 2021. Additionally, Blue Dart was also presented with the Gold Award in the Sustainability category at the DPDHL CEO Awards, 2017. The success of the Blue Edge: Empowering Lives programme ensured that it was nominated as a Lighthouse Project under GoTeach from AP EEMEA. The program also received funding of 50,000 Euros from DHL as a token of appreciation for the good work conducted in the field of education and also for further extension of this program to another city in India. This fund was used to set up the Blue Edge centre in Chennai which began operations in April 2011. Classes in Chennai and Bengaluru have been concluded successfully.

Under GoTeach we also have Blue Teach which aims to reach out to beneficiaries and touches their lives right from their childhood. Blue Teach elevates the lives of children from different strata of society, in an effort to ensure they grow up to be confident and independent adults. Blue Dart along with its other business units – DHL Express, DHL Global Forwarding and DHL Supply Chain support Teach For India ("TFI"), a non-profit organization that is a part of the Teach For All network. TFI operates in 353 schools across seven cities in India - Mumbai, Pune, New Delhi, Chennai, Ahmedabad, Bengaluru and Hyderabad reaching approximately 40,000 students.
Under GoGreen, Blue Dart has undertaken certain initiatives to protect the environment. The initiatives include:

1. Plantation of saplings – (Planted 5,55,000 trees till date which will offset 1,11,00,000/year)
2. Energy conservation techniques such as usage of LED lamps in offices, power saver, GoGreen lights off initiative
3. Celebration of Earth-Hour every month, Earth Day, World Environment Day
4. Installation of sensors in water taps to save water
5. Route optimisation techniques

Lastly, GoHelp is another important pillar that plays a crucial role in improving the lives of the underprivileged and is aligned to SDGs 1, 2, 3, 10, 12 and 16. These initiatives come under Blue Homes (SOS Children’s Villages of India & St. Jude India ChildCare Centres) and Blue Help (Vision Foundation of India, United Way of Bengaluru & Nanhi Pari Foundation). We also recently supported the Assam Flood Relief in collaboration with DHL.

As an environmentally responsible organisation we also aim to follow the mandate of Mission 2050: net-zero emissions - From 2017 until 2050, the Group’s mission is to drive our logistics business toward net-zero emissions by setting the standard for the future of the transport sector and doing our part to help the world community reach its goal of limiting global warming to less than 2° C. DPDHL Group has set a target of 30% efficiency improvement over the base set in 2008 by 2020 for all its group companies. Blue Dart has surpassed the target by achieving an efficiency improvement of 31% in 2019 itself. Blue Dart has achieved an efficiency improvement of 34% in 2021. We have also signed the UNFCCC Climate Neutral Now pledge as an initiative towards achieving a climate neutral future.

The following diagram is an overview of the three pillars of CSR and initiatives under these three pillars.
Connecting People, Improving Lives

Go Tech
- Blue Edge
  - Vocational training program including life skill computer training, English Speaking for young adults in
    - Mumbai
    - Chennai
    - Bengaluru
    - Kolkata
    - Delhi (3,967)

Go Green
- Blue Teach
  - Employee voluntarism in Municipal Schools in
    - Mumbai
    - Bangalore
    - Chennai
    - Ahmedabad
    - Hyderabad
- Blue Greens
  - Tree plantation for developing the Tribal communities Rural Communities of Gujarat and Andra Pradesh for developing
  - Ecotourism to Sikkim trees for Tigers at Kanha Panch Corridor and tree for Elephant (555,000)
    - Earth Hour, Earth Day, World Environment Day
    - Word Elephant Day, International Tiger Day
    - Lights of in the office
- Blue Homes
  - Family based Care Programme at
    - Jammu, Srinagar, Bhuj, Raipur, Latur & Cochin (165)
  - Residential Centers for cancer for cancer affected children along with their parents in Guwahati (3,870)

Go Help
- Blue Help
  - Cataract Operations with Intra Ocular Implantation for Senior Citizens in
    - Mumbai, Thane, Palghar, Nashik & Nandurbar Districts (6,667)
  - Free eye surgeries for lower social of Society in
    - Gujarat & Bihar (250)
  - COVID Vaccine Mobilization & Administrative Support in Bengaluru
    - Pune & Gurgaon (2775)
  - Access to Drinking Water for households in
    - Nashik
Mumbaigiri

Soundrise

Introduction

In a quest to make every Sunday a fun day with live music in our parks - starting a not-for-profit community named ‘Soundrise’, was the brainchild of Mohit Chhatrapati, a Mumbaikar & Investment Professional. Having lived in New York for many years, Mohit had witnessed many community-driven, outdoor music events and thus, wanted to bring this concept to our city.

According to Mohit, an outdoor community music event is a safe space for people to discover new musicians, and talent and introduce music to new audiences. What started as a family-friendly, community space for playing music on Sunday mornings has now evolved into numerous indoor and outdoor gigs and evening performances as well!

The four founders of Soundrise (Mohit Chhatrapati – Investment Professional, Raoul Nanavati – Founder and CEO of tech start-up Navana Tech, Shaan Khanna – Co-Founder of Spicy Sangria events & Founder of Networking Now India, Varun Narayan- Actor, singer and voice artist) individually bring very different expertise and perspective to Soundrise.

How does Soundrise organise these gigs?

Makarand and Harshita Narwekar, BMC corporators in Colaba played an important role in assisting musicians with a venue, permissions, and more for the launch of their outdoor park gigs. They also proudly share that the funding for these gigs would not have been possible without the support of numerous small businesses who participated with them to help.

Adding more on how they operate, they mentioned that they have a dynamic team of interns and employees who collaborate with many up-and-coming artists to bring new types of music for people. Overwhelmed by the response they received till now, the musicians of Soundrise thank the #FriendsOfSoundRise community for all their support and immense help.

Further, Mohit also pointed out that they have massive support from the music community overall. Some of the names include Ryan Sadri, Saxophonist, Tanish Thakker from Gatecrash Music Management amongst others. He firmly believes that they have been a strong backbone to initiatives taken by the Soundrise team.

“And of course, the artists who’ve taken a chance to perform at a “free” gig for Soundrise are the real heroes”, adds Mohit. Their idea is to have open, free community gigs where people have access to new and fabulous music and a great way to spend their weekend mornings with their kids, pets, and friends.
Soundrise tryst with Mumbaikars and the idea of live music in open spaces

The team exclaims that their experiences have been extremely phenomenal! They started out with only 70 people at the first gig and slowly rose to 200-500 people for their subsequent events. They believe that their efforts have been nothing but rewarding! The team believes in the power of community, social media, and a group of like-minded people wanting to come together for a common cause!

“We’re so grateful that it’s been well received and our inboxes are constantly full asking for the next gig”, exclaimed Mohit. Their team has done 16 gigs so far and is working on the calendar for the upcoming season in the hope of doing many more outdoor gigs once the weather permits.

Major challenges and obstacles Soundrise faces in organising the gigs

Mohit believes that raising funds and permissions for gigs is the greatest challenge in front of them. The team works relentlessly to get more supporters and brands who are eager to come forward to support their free community gigs. He mentioned that the free community gigs of Soundrise follow a model of donations where the audience is encouraged to donate directly to the artists for their time and talent. Adding to this, he also emphasised that while people have been generous, there is definitely scope to give more to the artists.

Encouraging citizens to be part of our music community and a way forward

In order to increase citizen participation, the team of Soundrise urged new artists and talent who want to be part of their music community to reach out to them and the founders on Instagram ‘@soundrise.live’. Soundrise is constantly looking for new talent and thus, citizens can follow their social media pages to be aware of upcoming events.

“’They can also attend our gigs and DONATE. The most important is support for our performers who come in and play/perform for free. By creating more public parks and giving permission for organisations like sound rise to host more events. It would be wonderful to have more spaces for us to keep moving with our events.’
Mumbai First exclusive feature in Tactical Thursday

On 9th June, 2022, Mumbai First CEO Dr. Neville Mehta was featured in Tactical Thursday under an initiative taken by MCGM, Tactical Urbanism. He addresses the need for a Private-Public Partnership (PPP) model in assisting and tackling issues related to education, housing, transport and mobility, art heritage and culture, governance, security and resilience, health, economic growth, environment, and climate change.
